# Independent assurance statement on selected sustainability information

## To the directors of Impala Platinum Holdings Limited

We have undertaken an assurance engagement on selected sustainability information as described below and presented in the 2017 Sustainability Report of Impala Platinum Holdings Limited (Implats) for the year ended 30 June 2017 (the report). This engagement was conducted by a multidisciplinary team of health, safety, social, environmental and assurance specialists with relevant experience in sustainability reporting.

## Subject matter and related assurance

We are required to provide:

### 1. Reasonable assurance on the following key performance indicators:

	<b>KPIs prepared in accordance with the Global Reporting Initiative Sustainability Reporting Guidelines (GRI G4 Guidelines), supported by Implats' internal guidelines</b>	<b>Assured value</b>	<b>Page</b>	<b>Boundary</b>
<b>1</b>	Contractor and employee work-related fatalities	9 fatalities	27, 63	Implats Group
<b>2</b>	Contractor and employee lost time injury frequency rate (LTIFR)	5.92	26, 63	Implats Group
<b>3</b>	All injury frequency rate (AIFR)	13.14	26, 63	Implats Group
<b>4</b>	New cases of noise induced hearing loss (NIHL) submitted for compensation	88 cases	32, 63	Implats Group
<b>5</b>	New cases of pulmonary tuberculosis diagnosed and treated	199 cases	33, 63	Implats Group
<b>6</b>	Employees on antiretroviral treatment (ARV/ART) – net enrolment at year-end	5 174 employees	33	Implats Group
<b>7</b>	Employee voluntary counselling and testing interventions (VCT)	16 733 tested cases	33, 63	Implats Group
<b>8</b>	Energy consumed	18 065 GJ000	59, 64	Implats Group
<b>9</b>	Water withdrawn	25 709 MI	57, 64	Implats Group
<b>10</b>	Water consumption	47 485 MI	57, 64	Implats Group
<b>11</b>	Total indirect carbon dioxide (CO <sub>2</sub> ) Scope 2 emissions	3 298 899 tonnes	64	Implats Group
<b>12</b>	Total nitrogen oxide (NO <sub>x</sub> ) emissions	14 574 tonnes	60, 64	Implats Group

### 2. Limited assurance on the following key performance indicators:

<b>(a)</b>	<b>KPIs prepared in compliance with the Amendment to the Broad-Based Socio-Economic Empowerment Charter for the South African Mining and Minerals Industry (BBSEEC) (2010) and related Scorecard (2010)</b>	<b>Assured value</b>	<b>Page</b>	<b>Boundary</b>
<b>13</b>	Number of employees who are classified as historically disadvantaged South Africans (HDSA) and who are employed at management positions, above the supervisor level – excluding non-executive directors (D, E and F levels only)	365 employees	37	South African operations only
<b>14</b>	Number of women employees in management positions, above the supervisor level – excluding non-executive directors	139 employees	37	South African operations only
<b>15</b>	Number of people trained through adult education (AET) – net enrolment at year end	161 people	35	South African operations only
<b>16</b>	HDSA procurement (>25%) (in line with the Mining Charter categories of capital goods, services and consumable goods)	R6.7 billion	49, 65	South African operations only
<b>17</b>	Local procurement	R1 051 million spent on Tier 1 procurement	49	South African operations only

  

<b>(b)</b>	<b>KPIs prepared in accordance with the GRI G4 Guidelines, supported by Implats' internal guidelines</b>	<b>Assured value</b>	<b>Page</b>	<b>Boundary</b>
<b>18</b>	Total socio-economic development (SED) expenditure	R106 million	42, 43, 65	South African operations only
<b>19</b>	Total direct carbon dioxide (CO <sub>2</sub> ) Scope 1 emissions	410 334 tonnes	64	Implats Group
<b>20</b>	Total sulphur dioxide (SO <sub>2</sub> ) emissions	58 877 tonnes	60	Implats Group

### Directors' responsibilities

The directors are responsible for the selection, preparation and presentation of the selected sustainability information in accordance with the following reporting criteria:

- For the subject matters in 1 and 2 (b): the GRI G4 Guidelines, supported by Implats' internal guidelines; and
- For the subject matters in 2 (a): The Amendment to the BBSEEC (2010) and related Scorecard (2010).

This responsibility includes the identification of stakeholders and stakeholder requirements, material issues, for commitments with respect to sustainability performance and for the design, implementation and maintenance of internal control relevant to the preparation of the report that is free from material misstatement, whether due to fraud or error.

### Our independence and quality control

We have complied with the independence and all other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

KPMG Services Proprietary Limited applies the International Standard on Quality Control 1 and accordingly maintains a comprehensive system of quality control, including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

### Our responsibility

Our responsibility is to express an assurance opinion and conclusions on the selected sustainability information based on the work we have performed and the evidence we have obtained. We have conducted our engagement in accordance with the International Standard on Assurance Engagements (ISAE) 3000 (Revised), Assurance Engagements other than Audits or Reviews of Historical Financial Information, issued by the International Auditing and Assurance Standards Board. That standard requires that we plan and perform our engagement to obtain assurance about whether the selected sustainability information is free from material misstatement.

An assurance engagement in accordance with ISAE 3000 (Revised) involves assessing the suitability in the circumstances of Implats' use of its reporting criteria and performing procedures to obtain evidence about the quantification of the selected sustainability information and related disclosures. The nature, timing and extent of procedures selected depend on the practitioner's judgement, including the assessment of the risks of material misstatement, whether due to fraud or error. In making those risk assessments we considered internal control

relevant to Implats' preparation of the selected sustainability information. The procedures we performed were based on our professional judgement and included enquiries, observation of processes performed, inspection of documents, analytical procedures, evaluating the appropriateness of quantification methods and reporting policies, and agreeing or reconciling with underlying records.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the selected sustainability information set out in section 1 of the subject matter and related assurance paragraph above.

A limited assurance engagement is substantially less in scope than a reasonable assurance engagement in relation to both risk assessment procedures, including an understanding of internal control, and the procedures performed in response to the assessed risks. Given the circumstances of our limited assurance engagement on the selected sustainability information set out in section 2 of the subject matter and related assurance paragraph above, in performing the procedures listed above we:

- Interviewed management and site personnel to obtain an understanding of the internal control environment, risk assessment process and information systems relevant to the sustainability reporting process;
- Tested the processes and systems to generate, collate, aggregate, monitor and report the selected sustainability information, which included the following:
  - Inspected supporting documentation on a sample basis and performed analytical procedures to evaluate the data generation and reporting processes against the reporting criteria;
  - Undertook site visits to the Rustenburg (mining, concentration and smelting), Springs (refineries), Marula (mining and concentrating) operations; and reviewed selected information from the Zimplats (mining and concentration) and Mimosa operations remotely; and
- Evaluated whether the selected sustainability information presented in the report is consistent with our overall knowledge and experience of sustainability management and performance at Implats.

The procedures performed in a limited assurance engagement vary in nature from, and are less in extent than for a reasonable assurance engagement. As a result the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had we performed a reasonable assurance engagement. Accordingly, we do not express a reasonable assurance opinion on the matters described in section 2 of the subject matter and related assurance paragraph above.

# Independent assurance statement on selected sustainability information

## Reasonable assurance opinion and limited assurance conclusions

### 1. On the selected key performance indicators on which we are required to express reasonable assurance

In our opinion, the selected sustainability information set out in 1 of the subject matter and related assurance paragraph above for the year ended 30 June 2017 is prepared, in all material respects, in accordance with the GRI G4 Guidelines, supported by Implats' internal guidelines.

### 2. On the selected key performance indicators on which we are required to express limited assurance

a. Based on our work performed and the evidence we have obtained, nothing has come to our attention that causes us to believe that the selected sustainability information set out in 2(a) of the subject matter and related assurance paragraph above for the year ended 30 June 2017 is not prepared, in all material respects, in compliance with the Amendment to the BBSEEC (2010) and related Scorecard (2010).

b. Based on our work performed and the evidence we have obtained, nothing has come to our attention that causes us to believe that the selected sustainability information set out in 2(b) of the subject matter and related assurance paragraph above for the year ended 30 June 2017 is not prepared, in all material respects, in accordance with the GRI G4 Guidelines, supported by Implats' internal guidelines.

## Other matters

The maintenance and integrity of the Implats website is the responsibility of Implats' management. Our procedures did not involve consideration of these matters and, accordingly we accept no responsibility for any changes to either the information in the report or our independent assurance report that may have occurred since the initial date of presentation on the Implats website.

As part of this engagement we were requested by Implats to include staff from a black-owned South African firm in this engagement, in order to transfer knowledge about sustainability assurance. Team members from Nkonki Incorporated (Nkonki) worked on KPIs 13 – 18 listed in the subject matter and related assurance section above. This work was directed, supervised and reviewed by KPMG Services Proprietary Limited, and we remain solely responsible for our opinion. This is the second year of including Nkonki staff in the Implats sustainability assurance engagement.

## Restriction of liability

Our work has been undertaken to enable us to express the opinion and conclusions on the selected sustainability information to the directors of Implats in accordance with the terms of our engagement, and for no other purpose. We do not accept or assume liability to any party other than Implats, for our work, for this report, or for the opinion and conclusions we have reached.
